

# MINIMIZE DOWNTIME BY STOCKING CRITICAL PARTS ONSITE!

The peace of mind that comes from having the correct OEM parts on-hand for those unexpected times that threaten your operation is priceless. Typically, without redundancy in the number of boilers onsite, an unexpected shutdown of your boiler can have significant system downtime costs. Having the parts onsite that are critical to the operation of your boiler can minimize these costs and provide you with an immediate solution. We encourage you to purchase and maintain your own onsite inventory of critical parts. An experienced Victory Energy Representative can provide you with your personalized listing of critical parts.

However we do understand that it is impossible to maintain a spare parts inventory for every contingency. Our rapid response staff is on call to support you with ongoing spare parts as needed.

My advice is to plan with the best and be prepared for the worst. Victory Energy has years of experience providing OEM parts with some of the best prices in the industry. We offer Honeywell, Fireye, Clark-Reliance, McDonnell Miller, Ashcroft, Foxboro, Allen Bradley, Warrick, Rosemont and Yokogawa parts, ...to name just a few.

Contact Victory Energy today so we can identify your critical parts and get them to you well **before** a problem does.
