

CARBON REDUCTION

SUSTAINABILITY

IT'S IN OUR POWER

OUR PLEDGE: Our sustainability pledge informs and drives our work through every action across all projects and engagements. At Victory Energy, we believe that the future of all energy must be based upon carbon reduction. Our goal is to deliver more reliable, efficient and far cleaner energy solutions which truly impact the environment for today and future generations in the communities where we operate and live.

Our products are designed to deliver lower carbon intensity through more cost-effective and responsible innovation that benefits our world. We're dedicating significant financial resources to the development of renewables through investment in low carbon technologies that are both scalable and affordable. We're relentless in our pursuit of a greener world.

OUR FOCUS

- > ENERGY EFFICIENCIES
- > DECARBONIZATION
- > RENEWABLE FUELS
- > EMISSIONS REDUCTION

OUR PROMISE: To work closely with our customers to achieve real tangible carbon reduction improvements. This is accomplished by understanding their sustainability challenges and arriving at breakthrough solutions together.
