

SUPER-DUTY TROLLEY SYSTEM

The Safer! The Better!

INNOVATIVE NEW LABOR SAVING END-PANEL TROLLEY SYSTEM FOR EXPLORER® STD-50 ECONOMIZERS

Save Time and Money

Victory Energy offers a uniquely designed new trolley system with the user in mind as a significant maintenance upgrade for the current generation of EXPLORER STD 50 economizers with removable end panels currently in service.

The system offers a multitude of user benefits to facilitate easier and quicker maintenance intervals and return to service operation.

The system is completely turn-key design, fabricated and installed by Victory Energy allowing for seamless integration.

The trolley system delivers significant benefits to the operation of EXPLORER STD-50 economizers.

- Allows for easier and more frequent inspections and cleaning.
- Flexible designs – either one side or both sides of the unit.

All systems are custom designed and adaptable to each customer's existing application and product configuration.
